## SUMMARY

I have worked as a Junior software engineer with 2.3 year experience in Non technical Support project(.Net Technology). As i am passionate to work in java Technology and spring boot. I am practicing and willing to work in Java technology.

Also i have interest to learn different technologies which has high potential in coming days of tech industry which helps to enhance my skills, abilities and to grow in my career where i can contribute through my work.

## EDUCATION

**Master of Computer Applications|Computer Science**  
RNS Institute Of Technology

**Bengaluru | August 2021**

## WORK EXPERIENCE

**Junior Software Engineer | Cognizant Technology Solutions**      **Bengaluru |Dec 2021-Mar2024**

- I have worked on a non-technical support-based project of .Net technology.
- International Court-based project, which includes C#, SQL, and .Net Core. My work is to analyse the courts, which are shortlisted after the report is generated. Mainly based on SQL only.
- After Shortlisted courts occurs when there are problems with the Court site website, backfilling details of the files on date tracking, and current failure percentage. If there is any fault occurred in court after analysis, need to generate a TFS ticket and assign it to the particular debuggers.

## SKILLS

* Java	* SQL	* Spring Boot
* Hibernate	* Rest API	* Testing (Junit, Mockito)

## PROJECT

### Employee Management System (CRUD)

Technology : Java, Spring Boot, Spring Boot MVC , Thymeleaf, My SQL, REST API, Testing, Exception Handling.    CRUD operations

### Todo-Applications

Technology : Java, Spring Boot, Spring Boot MVC , Thymeleaf, My SQL

To create the task and marking as complete by striking out with basic operations.
